

Adi Iluz

Fullstack Programmer

ABOUT ME

An enthusiastic, autodidact, self-driven machine builder.

My goal in life is to build machines that will later on be used by users, thus, making people's life better

EDUCATION

2011 - 2014 B.A. degree in business school with internship in marketing and business technologies.

AUTODIDACT, CURIOS AND CREATIVE BY NATURE

WORKING EXPERIENCE

**2017 - Present Day | Owner and chief of
Accurate Software.**

Working with entrepreneurs, investors, product managers, designers, algorithm developers and programmers from SRS, technology assessment, tasks management to hands-on programming.

From 2018, Accurate Software has 2 employees (programmers), who then later became 4 and works with a variety of technologies, such as, React Native, Typescript, C/C++ , Java, JS, Node.JS and many more.

Has good management skills as a team leader, can also manage expectations with customers to a full satisfaction.

**2014 - 2017 | Fullstack
developer at Lendmart LLC**

This company develops large projects in which she partners with investors to create new technologies.

2014 - 2017 | Fullstack developer at
Lendmart LLC (part 2)

At Lendmart, I worked on two projects:

I have built an app for lenders in the USA. This app had two client sides: one in **Angular 1.5** and a **chrome plugin** to modify and improve existing web-based CRMs. This involved **deep statistical analysis and probability algorithms** on this data in order to determine a loan's return probability.

This job required multitasking and deep understanding at **Linux** servers, as a single server-side programmer and a client-side programmer I had a responsibility for all the company DevOps, and all the server-side programming of the entire company.

2012 - 2014 | EZMatch – Fullstack
Web Developer

This company deals with credit card accounting for large companies in the Israeli market. This company offers an interface between companies CRM and their CC clearing company.

I have worked on the web app written in JSX on top on Node.JS-Exporess server with MySQL DB.

Writing solid and complex queries on the server side using bootstrap 4 on client side.

P O R T F O L I O

2020 | Go2c – Find Your New Home

Go2c – All done by yours truly from design, programming, app stores management, investors presentation. Build in React Native Web, MobX, Express and MongoDB:

Android

<https://play.google.com/store/apps/details?id=io.go2c>

Nginx / Apache and
HTTP in general

Linux / Ubuntu

Python

MySQL

MongoDB
